The ManpowerGroup Employment Outlook Survey for the fourth quarter 2017 was conducted by interviewing a representative sample of 650 employers in New Zealand.

All survey participants were asked, “How do you anticipate total employment at your location to change in the three months to the end of December 2017 as compared to the current quarter?”

About the Survey 25
About ManpowerGroup® 26
New Zealand employers report hopeful hiring plans for the next three months. With 14% of employers expecting to increase staffing levels, 2% forecasting a decrease and 81% anticipating no change, the resulting Net Employment Outlook is +12%.

Once the data is adjusted to allow for seasonal variation, the Outlook stands at +11%. Hiring intentions decline by two percentage points when compared with the previous quarter and are four percentage points weaker when compared with this time one year ago.

Throughout this report, we use the term “Net Employment Outlook.” This figure is derived by taking the percentage of employers anticipating total employment to increase and subtracting from this the percentage expecting to see a decrease in employment at their location in the next quarter. The result of this calculation is the Net Employment Outlook.

From this point forward, all data discussed in the commentary is seasonally adjusted, unless stated otherwise.
Organisation-Size Comparisons

Participating employers are categorised into one of four organisation sizes: Micro businesses have less than 10 employees; Small businesses have 10-49 employees; Medium businesses have 50-249 employees; and Large businesses have 250 or more employees.

Staffing levels are expected to increase in all four organisation size categories during Quarter 4 2017, with Large employers anticipating the strongest hiring pace, reporting a Net Employment Outlook of +21%. Elsewhere, an upbeat hiring climate is forecast by Medium employers with an Outlook of +18%, while Outlooks stand at +9% and +8% in the Micro- and Small-size categories, respectively.

When compared with the previous quarter, Small employers report a moderate decline of five percentage points, while Outlooks are two percentage points weaker for Medium- and Large-size employers. However, Micro employers report an improvement of three percentage points.

Hiring intentions decline by 10 and five percentage points for Small- and Medium-size employers, respectively, when compared with this time one year ago. Meanwhile, Micro employers report relatively stable hiring plans, while Large employers report a considerable improvement of 20 percentage points.
Employment levels are forecast to increase in all three regions during the coming quarter. The strongest labour market is anticipated in Christchurch where employers report a Net Employment Outlook of +12%. Elsewhere, Outlooks stand at +11% and +10% in Auckland and Wellington, respectively.

When compared with Quarter 3 2017, hiring prospects weaken in Christchurch and Auckland, where employers report decreases of five and three percentage points, respectively. However, the Outlook for Wellington is two percentage points stronger.

Auckland employers report a moderate decline of five percentage points when compared with this time one year ago, but Outlooks remain relatively stable in both Christchurch and Wellington.
Auckland

Job seekers can expect respectable hiring opportunities in the final quarter of 2017, according to employers who report a Net Employment Outlook of +11%. However, hiring plans are three percentage points weaker when compared with the previous quarter, and decline by five percentage points when compared with Quarter 4 2016.

Christchurch

Employers forecast a steady hiring pace in the October-December period, reporting a Net Employment Outlook of +12%. However, the Outlook declines by five percentage points quarter-over-quarter. When compared with this time one year ago, hiring prospects remain relatively stable.

Wellington

With a Net Employment Outlook of +10%, employers forecast moderate payroll gains during the next three months. Hiring intentions improve by two percentage points when compared with the previous quarter, and remain relatively stable year-over-year.
Employers in all seven industry sectors anticipate an increase in staffing levels during the upcoming quarter. The strongest labour market is expected in the Mining & Construction sector, with a Net Employment Outlook of +18%. Elsewhere, steady workforce gains are forecast for three sectors with Outlooks of +12% – the Public Administration & Education sector, the Transportation & Utilities sector and the Wholesale & Retail Trade sector. Respectable hiring activity is also anticipated in the Finance, Insurance & Real Estate sector and the Services sector, with Outlooks standing at +11%. Meanwhile, the weakest Outlook of +9% is reported in the Manufacturing sector.

Quarter-over-quarter, Outlooks weaken in five of the seven industry sectors. Finance, Insurance & Real Estate sector employers report the most notable decrease of nine percentage points. Hiring plans are six percentage points weaker in the Mining & Construction sector, while declining by five percentage points in both the Manufacturing sector and the Transportation & Utilities sector. However, slight improvements of two percentage points are reported in both the Public Administration & Education sector and the Services sector.

Hiring intentions also weaken in five of the seven industry sectors when compared with this time one year ago. The Outlook for the Mining & Construction sector declines by nine percentage points, while decreases of five percentage points are reported in both the Manufacturing sector and the Wholesale & Retail Trade sector. Employers in two sectors – the Finance, Insurance & Real Estate sector and the Services sector – report declines of three percentage points. Meanwhile, hiring prospects improve by two percentage points in both the Public Administration & Education sector and the Transportation & Utilities sector.

ManpowerGroup Employment Outlook Survey
Finance, Insurance & Real Estate

Employers report hopeful hiring intentions for the final quarter of 2017 with a Net Employment Outlook of +11%. However, hiring prospects decline by nine percentage points when compared with the previous quarter, and are three percentage points weaker when compared with this time one year ago.

Manufacturing

With a Net Employment Outlook of +9%, employers forecast some payroll gains during the next three months. However, hiring plans decline by five percentage points both quarter-over-quarter and year-over-year.

Mining & Construction

A favourable hiring climate is expected in the upcoming quarter, with employers reporting a Net Employment Outlook of +18%. However, hiring intentions are six percentage points weaker when compared with Quarter 3 2017, and decline by nine percentage points when compared with the final quarter of 2016.
Public Administration & Education

Job seekers can expect a steady hiring pace in Quarter 4 2017, according to employers who report a Net Employment Outlook of +12%. The Outlook improves by two percentage points both quarter-over-quarter and year-over-year.

Services

Respectable payroll gains are anticipated in the October-December time frame. Employers report a Net Employment Outlook of +11%, improving by two percentage points when compared with the previous quarter, but declining by three percentage points when compared with Quarter 4 2016.

Transportation & Utilities

Employers forecast positive hiring activity in the next three months, reporting a Net Employment Outlook of +12%. While hiring prospects decline by five percentage points when compared with Quarter 3 2017, employers report an improvement of two percentage points when compared with this time one year ago.
Wholesale & Retail Trade

Reporting a Net Employment Outlook of +12%, employers anticipate steady workforce gains during the forthcoming quarter. However, hiring intentions decline by three and five percentage points quarter-over-quarter and year-over-year, respectively.

The ManpowerGroup Employment Outlook Survey is ManpowerGroup’s quarterly index of employer hiring confidence.

ManpowerGroup interviewed over 59,000 employers across 43 countries and territories to forecast labour market activity* in Quarter 4 2017. All participants were asked, “How do you anticipate total employment at your location to change in the three months to the end of December 2017 as compared to the current quarter?”

Fourth-quarter forecasts are mostly positive with employers in 42 of 43 countries and territories expecting workforces to grow by varying margins over the next three months. Only employers in Switzerland forecast a flat fourth-quarter hiring pace. As a result, for the first time since Quarter 2 2008 and the ensuing global recession there are no negative Net Employment Outlooks in any of the 43 countries and territories surveyed. When compared with Quarter 3 2017, Outlooks improve in 23 of the 43 countries and territories, decline in 13 and are unchanged in seven. When compared with this time one year ago, hiring plans strengthen in 25 of the 43 countries and territories, weaken in 15 and are unchanged in three. The most optimistic Net Employment Outlooks are reported in Japan, Taiwan, Costa Rica, India and Hungary. The weakest fourth-quarter hiring plans are reported in Switzerland, Brazil and the Czech Republic.

Employers in all 10 countries in the Americas expect to grow staffing levels by varying degrees in Quarter 4 2017. Hiring prospects improve in five countries when compared to Quarter 3 2017, weaken in two and are unchanged in three. In a year-over-year comparison, employer hiring confidence improves in six countries but weakens in four. Employers in Costa Rica and the United States report the strongest fourth-quarter hiring plans. The weakest hiring climate is expected in Brazil, but employers there report subdued, but positive, hiring plans for the second consecutive quarter following more than two years of negative forecasts.

Payroll growth is forecast in each of the eight Asia Pacific countries and territories, with hiring prospects improving from three months ago in five, declining in two and remaining unchanged in one. When compared to Quarter 4 2016, forecasts strengthen in four countries and territories, decline in three and are unchanged in one. Employers in Japan and Taiwan report the strongest job prospects while the weakest forecast is reported in China.

Across the 25 countries in the Europe, Middle East and Africa (EMEA) region, employers expect some job growth in 24 countries, with only Swiss employers expecting a flat hiring environment. Hiring intentions strengthen in 13 countries when compared with the third quarter, weaken in nine, and are unchanged in three. In the year-over-year comparison employers in 15 countries report stronger forecasts, those in eight expect the hiring pace to slow, while forecasts in two countries remain unchanged. For the second consecutive quarter employers in Hungary report the EMEA region’s strongest forecast. Swiss employers report the weakest fourth-quarter hiring plans.

Full survey results for each of the 43 countries and territories included in this quarter’s survey, plus regional and global comparisons, can be found at www.manpowergroup.com/meos

The next ManpowerGroup Employment Outlook Survey will be released on 12 December 2017 and will detail expected labour market activity for the first quarter of 2018.

* Commentary is based on seasonally adjusted data where available. Data is not yet seasonally adjusted for Portugal.
Interviews with more than 15,000 employers across the region indicate payrolls will grow by varying degrees in each of the eight countries and territories during the October-December time frame.

Employers in Japan report the most optimistic forecast in the region as well as among all 43 countries and territories that participated in the survey. Japanese job seekers can expect demand for their talents to remain strong in the last three months of 2017 – especially in the Mining & Construction sector where more than three of every 10 employers surveyed said they intend to add to their payrolls.

The hiring pace in Taiwan should remain similarly active with Manufacturing sector employers reporting the strongest fourth-quarter hiring plans, along with healthy job prospects reported in the Finance, Insurance & Real Estate, Services, and Wholesale & Retail Trade sectors.

The Outlook in India has rebounded slightly from the prior quarter when Indian employers reported the weakest forecast since the survey started in 2005. Industry sector forecasts remain mostly weaker than year-ago levels, but improve by varying degrees in most sectors in a quarter-over-quarter comparison. The fourth quarter’s strongest job growth is expected in the Services and the Transportation & Utilities sectors.

Hiring plans in Hong Kong improve marginally from three months ago and last year at this time, and the overall labour market forecast remains upbeat. Some degree of payroll growth is expected in all industry sectors, especially in the Services and Finance, Insurance & Real Estate sectors where approximately a quarter of all employers surveyed said they planned to pursue some workforce gains through the end of the year.

Australian employers project a fair fourth-quarter hiring climate with job gains expected in all seven industry sectors and in all but one region. Job seekers are likely to find the most opportunities in the Transportation & Utilities sector, and a steady hiring pace is also forecast in the Mining & Construction and Services sectors.

Employers forecast a steady hiring pace in New Zealand though the country’s Outlook has softened in comparison to three months ago and last year at this time. For the third consecutive quarter, employers in the country’s Mining & Construction sector report the strongest hiring confidence.

Meanwhile, employers in Singapore forecast their strongest hiring plans in two years. Outlooks are positive in all sectors except Mining & Construction, with the most hiring activity anticipated in both the Public Administration & Education and the Services sectors where approximately a quarter of the employers surveyed said they intended to hire during the last three months of the year.

Similarly, job prospects in China are the strongest reported in more than two years. Staffing levels are expected to grow in all industry sectors and in all regions, with the strongest job growth anticipated in the Transportation & Utilities sector where the forecast improves considerably when compared both quarter-over-quarter and year-over-year.

International Comparisons – Americas

Over 23,000 employers from 10 countries throughout North, Central and South America were interviewed for the Quarter 4 2017 survey. Employers expect payrolls to grow in all countries by varying margins.

Costa Rican employers report the region’s most optimistic fourth-quarter hiring plans. The favourable forecast is boosted by expectations of a brisk hiring pace in the Transport & Communications sector where the Outlook climbs considerably in comparison to the prior quarter and last year at this time.

U.S. employers continue to report upbeat hiring plans for the fourth quarter. Once again Leisure & Hospitality employers expect the most active labour market. The U.S. Outlook is also buoyed by an upbeat forecast in the Manufacturing-Durables sector where employer hiring plans are the strongest reported since Quarter 4 2007, and solid hiring plans in the Professional & Business Services sector.

Employer forecasts in Canada remain cautiously optimistic with some job growth expected across all industry sectors. For the fourth consecutive quarter Public Administration sector employers report the strongest hiring plans, with upbeat forecasts also reported in the Finance, Insurance & Real Estate and Manufacturing-Durables sectors.

The hiring pace in Mexico is predicted to remain steady through the last three months of the year with the most opportunities for job seekers expected in the Manufacturing, Services and Transportation & Communication sectors.

Further south, employers forecast various degrees of payroll growth across all industry sectors and regions in Guatemala where for the second consecutive quarter opportunities for job seekers are expected to be strongest in the Services sector.

Job prospects in Panama also rebound slightly from the prior quarter where employer hiring plans indicate the most active fourth-quarter labour market will be in the Services sector.

Employers in all four countries surveyed in South America anticipate varying degrees of modest job growth. Job seekers in Argentina may benefit from the strongest hiring plans reported since Quarter 3 2014 with payroll gains expected in all nine industry sectors, including the Construction sector where the Outlook is the most optimistic reported in more than six years.

Conversely, Colombian employers expect the hiring pace to maintain some momentum, but the Outlook dips to its weakest level in more than eight years, dragged down in part by the Services sector where employers report the first negative forecast since the survey was launched in 2008.

Employer hiring plans are similarly reserved in Peru where the forecast points to limited job growth. The Outlook is unchanged from three months ago and remains the weakest reported since the survey began more than 11 years ago. Forecasts in Peru’s Wholesale & Retail Trade and the Transportation & Utilities sectors also dip to their least optimistic levels since the survey launched.

Meanwhile, Brazil’s employers continue to report the weakest fourth-quarter hiring plans in the Americas. However, the country’s Outlook remains positive for the second consecutive quarter following a period of nine consecutive quarters of negative forecasts.

The Quarter 4 2017 survey is the result of interviews with nearly 21,000 employers in 25 countries in the Europe, Middle East and Africa (EMEA) region. With the exception of Switzerland, where job growth is expected to be essentially stagnant through the end of the year, the region’s employers expect varying degrees of fourth-quarter payroll gains.

For the second consecutive quarter, employers in Hungary forecast the region’s strongest labour market. Nearly a third of Hungary’s Manufacturing sector employers anticipate hiring over the next three months and the sector’s Outlook remains the strongest reported in the country since the survey began in 2009. The fourth-quarter forecast is also notable in Greece where employer confidence is the strongest in more than nine years. Forecasts are similarly upbeat in Romania, Bulgaria, Slovenia and Turkey.

A fair hiring climate is anticipated in the UK, and the Outlook remains relatively stable in comparison to the third-quarter forecast and last year at this time, even as employers await further clarification regarding ongoing Brexit negotiations.

Meanwhile, the Outlook in France remains modest, but it is the strongest reported by employers in more than two years, with employment levels forecast to grow in six of 10 industry sectors and four of five regions. Similarly, hiring activity in Germany is expected to hold firm with the strongest forecasts reported in the Finance & Business Services and Manufacturing sectors.

Encouraging signs are notably evident in Italy where hiring plans turn positive following three consecutive quarters of negative reports, and are boosted, in part, by the most optimistic Manufacturing sector forecast in more than nine years.

The Outlook in Austria grows moderately stronger in both quarter-over-quarter and year-over-year comparisons, propelled by considerable gains from the prior quarter’s survey in the Transport, Storage & Communications and Manufacturing sectors. In Poland, expectations of a steady hiring pace in the Manufacturing and Construction sectors are buoying the country’s cautiously optimistic labour market forecast.

Job gains in the Nordic countries are expected to be mostly modest. However, employer confidence in Finland has climbed steadily for four consecutive quarters and the fourth-quarter Outlook is the strongest reported since the country joined the survey in 2012. Norwegian job seekers are likely to find the most opportunities in the Construction and Mining & Quarrying sectors, while in Sweden the most favourable hiring plans are reported by Utilities sector employers.

Similarly, Utilities sector employers are the most optimistic in the Netherlands. In fact, the sector’s Outlook has improved steadily for three consecutive quarters and is now stronger than at any point since the survey began. In Belgium, Outlooks remain positive in most industry sectors and all regions with the strongest fourth-quarter hiring plans reported by employers in the Construction sector.

Israel’s Outlook softens from three months ago and last year at this time, but employers still expect staffing levels to increase by varying degrees in all industry sectors and regions in the months ahead. Meanwhile, employers in South Africa continue to see some opportunities for job seekers in most sectors and all regions despite the Outlook declining slightly from one year ago.

About the ManpowerGroup Employment Outlook Survey

The ManpowerGroup Employment Outlook Survey is conducted quarterly to measure employers’ intentions to increase or decrease the number of employees in their workforces during the next quarter. ManpowerGroup’s comprehensive forecast of employer hiring plans has been running for more than 50 years and is one of the most trusted surveys of employment activity in the world. Various factors underpin the success of the ManpowerGroup Employment Outlook Survey:

Unique: It is unparalleled in its size, scope, longevity and area of focus.

Projective: The ManpowerGroup Employment Outlook Survey is the most extensive, forward-looking employment survey in the world, asking employers to forecast employment over the next quarter. In contrast, other surveys and studies focus on retrospective data to report on what occurred in the past.

Independent: The survey is conducted with a representative sample of employers from throughout the countries and territories in which it is conducted. The survey participants are not derived from ManpowerGroup’s customer base.

Robust: The survey is based on interviews with over 59,000 public and private employers across 43 countries and territories to measure anticipated employment trends each quarter. This sample allows for analysis to be performed across specific sectors and regions to provide more detailed information.

Focused: For 55 years the survey has derived all of its information from a single question:

For the Quarter 4 2017 research, all employers participating in the survey worldwide are asked the same question, “How do you anticipate total employment at your location to change in the three months to the end of December 2017 as compared to the current quarter?”

Methodology

The ManpowerGroup Employment Outlook Survey is conducted using a validated methodology, in accordance with the highest standards in market research. The survey has been structured to be representative of each national economy. The margin of error for all national, regional and global data is not greater than +/- 3.9%.

In New Zealand, the national survey is conducted by external surveyors and includes 650 employers. With this number of interviews, the margin of error for the New Zealand Survey is +/- 3.8%.

Net Employment Outlook

Throughout this report, we use the term “Net Employment Outlook.” This figure is derived by taking the percentage of employers anticipating an increase in hiring activity and subtracting from this the percentage of employers expecting to see a decrease in employment at their location in the next quarter. The result of this calculation is the Net Employment Outlook. Net Employment Outlooks for countries and territories that have accumulated at least 17 quarters of data are reported in a seasonally adjusted format unless otherwise stated.

Seasonal adjustments have been applied to the data for all participating countries except Portugal. ManpowerGroup intends to add seasonal adjustments to the Portuguese data in the future, as more historical data is compiled. Note that in Quarter 2 2008, ManpowerGroup adopted the TRAMO-SEATS method of seasonal adjustment for data.
ManpowerGroup® (NYSE: MAN), the leading global workforce solutions company, helps organisations transform in a fast-changing world of work by sourcing, assessing, developing and managing the talent that enables them to win.
